Data can be presented in the form of graphic flow charts, pie charts, bar charts and tables. PC OMR can generate and print both hard-copy and electronic reports. OMR (Optical Microscope Reporting) is a software program that allows the operator to view, measure, and analyze biological samples. The software allows scientists to examine specimens and produce colorful graphic representations of the specimens. The software was created by Bruce Greenstein, a retired optical physicist at the University of California-Berkeley. Is there any resources that you think are good for learning C? I've been working on learning Python over the last month and it's going great, but I'm having a hard time transitioning from Python to C. ===== ai\_ja I started with "C A Reference Manual" and then "The C Programming Language". The real key is to start building small applications. Q: Android coding using Retrofit service in Kotlin/Java I'm trying to build a simple sign up screen in android which will send POST requests to a backend service and sign up new users. I have a simple web API written in PHP which is used to communicate with the backend. My issue is, that I'm using Retrofit for the HTTP requests and right now I'm not sure how to call the PHP API. I'm trying to pass in an ID which I retrieved from a Firebase database. This is how I call the API from my activity: private fun signUp() { val call = BackendService.createSignUpRequest(BackendService.getNewUserId()) call.enqueue(object : Callback { override fun onResponse(call: Call, response: Response) { println("CREATE USER") 82157476af
